The Past in the Present Jan 02 2020 The Past in the Present deals with the complexities in the operation and management of living heritage sites. It presents a new interpretation of such sites based on the concept of continuity, and its evolution to the present. It is demonstrated that the current theoretical framework and practice of conservation, as best epitomised in a values-based approach and the World Heritage concept, is based on discontinuity created between the monuments (considered to belong to the past) and the people of the present, thus seemingly unable to embrace living heritage sites. From this position, the study suggests an innovative approach that views communities and sites as an inseparable entity: a Living Heritage Approach. This approach brings a new insight into key concepts such as authenticity and sustainable development. Through the use of the monastic site of Meteora, Greece, as a case study, the discussion generated aims to shift the focus of conservation from 'preservation' towards a continual process of 'creation' in an ongoing present, attempting to change the way heritage is perceived, protected and, more importantly, further created. "The Past in the Present is an important and much-needed contribution to the debate about living heritage – and it is particularly significant in the context of the heritage of the past in the modern world. Anyone concerned with how the past is, or should be, integrated within modern lives and identities will need to read this book." – Leslie Brubaker, Director, Centre for Byzantine, Ottoman and Modern Greek Studies, University of Birmingham, UK. "This interesting and thoroughly researched book by Ioannis Poullos is a useful tool in promoting the Living Heritage Approach, and provides a sound theoretical basis for future work. Living Heritage Approach is a paradigm shift that suggests a new way of addressing conservation for our heritage. ICCROM is proud to have introduced this approach, also with the contribution of Ioannis." – Gaminí Wijesuriya, Project Manager, ICCROM.

Foundation Papers in Landscape Ecology Jun 26 2019 The editors begin with articles that illuminate the discipline's diverse scientific foundations, such as L.

The Online Tutor's Toolkit Dec 13 2020 This book contains everything you need to know to get started as an online tutor. It covers the essentials of tutoring, choosing your tech and software, managing homework, and getting set up alongside detailed guidance focusing on each level of tuition. With techniques developed through research and first-hand experience, the author explains exactly how to turn

existing subject knowledge into effective tutoring for students of all ages in a variety of subjects. Divided into two parts, the first answers the logistical questions facing every new tutor such as: what equipment do I need? Where can I apply? How much should I charge? The second half focuses on how to tutor different age groups effectively and subject-specific areas including English, Maths, and Science, as well as the author's tried-and-tested '5 step' process for choosing a subject, assessing a student, and planning their first lessons. There is also information on how to support students writing personal statements and applying to university, as well as teaching English as a Second Language. Alongside tailored, up-to-date information on available software, hardware, exam specifications, and the online tutoring marketplace, the book contains a 10-week timetable of adaptable lesson plans so new tutors can get started immediately. Finally, there are two additional downloadable chapters which expand on less common subjects and another which includes a digital download of every resource from the book. With suggestions for resources, homework, and timings to support you at every stage, this is an essential read for anyone wanting to succeed as an online tutor.

Lean Six Sigma For Dummies outlines the key concepts of this strategy in plain English and explains how you can use it to get the very best out of your business. Combining the leading improvement methods of Six Sigma and Lean, this winning technique drives performance to the next level.

The Puttermesser Papers Oct 30 2019 With dashing originality and in prose that sings like an entire choir of sirens, Cynthia Ozick relates the life and times of her most compelling fictional creation. Ruth Puttermesser lives in New York City. Her learning is monumental. Her love life is minimal (she prefers pouring through Plato to romping with married Morris Rappoport). And her fantasies have a disconcerting tendency to come true - with disastrous consequences for what we laughably call "reality." Puttermesser yearns for a daughter and promptly creates one, unassisted, in the form of the first recorded female golem. Laboring in the dusty crevices of the civil service, she dreams of reforming the city - and manages to get herself elected mayor. Puttermesser contemplates the afterlife and is hurled into it headlong, only to discover that a paradise found is also paradise lost. Overflowing with ideas, lambent with wit, The Puttermesser Papers is a tour de force by one of our most visionary novelists. "The finest achievement of Ozick's career... It has all the buoyant integrity of a Chagall painting." -San Francisco Chronicle "Fanciful, poignant... so intelligent, so finely expressed that, like its main character, it remains endearing, edifying, a spark of light in the gloom." -The New York Times "A crazy delight." -The New York Times Book Review

Independent Thinking on MFL Dec 01 2019 Crista Hazell's Independent Thinking on MFL: How to make modern foreign language teaching exciting, inclusive and relevant takes teachers on a tour of how to get the teaching of a new language right. Foreword by Ian Gilbert. Learning a new language has the power to transform a life, as well as help break down the barriers that seem to be re-emerging between nations, cultures and people. In the UK, MFL teaching has always had to battle with the 'everyone speaks English' argument, not to mention that, for so many, all that remains of their years learning a foreign language is *bitte*, *por favor* or *s'il vous plait*. But with teachers like Independent Thinking Associate Crista Hazell at the front of the class, things can be very different. Drawing on her many years of experience as an MFL teacher and head of department, Crista shares tips, techniques and inspirational ideas geared to help teachers build confidence, increase enjoyment and improve outcomes as they take their MFL teaching to a whole new level. Crista provides a range of strategies from how to hook students in the minute they enter the classroom to ensuring that the vocabulary sticks designed to help learners develop confidence, take risks and enjoy the challenge that learning a new language brings. She also offers ideas and advice on how to make learning new vocabulary and grammar a great deal more effective and empowers teachers to open up the benefits and enjoyment of learning a language to all students, not just those in the top sets. Ultimately, however, her book sets out to help teachers create engaging, relevant and memorable learning experiences in the MFL classroom and encourage their learners to become lifelong and passionate linguists. For MFL teachers and heads of languages departments in primary schools, secondary schools and colleges.
