Idealism, Relativism, and Realism Dec 10 2020 Several debates of the last years within the research field of contemporary realism - known under titles such as "New Realism," "Continental Realism," or "Speculative Materialism" - have shown that science is not systematically the ultimate measure of truth and reality. This does not mean that we should abandon the notions of truth or objectivity all together, as has been posited repeatedly within certain currents of twentieth century philosophy. However, within the research field of contemporary realism, the concept of objectivity itself has not been adequately refined. What is objective is supposed to be true outside a subject's biases, interpretations and opinions, having truth conditions that are met by the way the world is. The volume combines articles of internationally outstanding authors who have published on either Idealism, Epistemic Relativism, or Realism and often locate themselves within one of these divergent schools of thought. As such, the volume

focuses on these traditions with the aim of clarifying what the concept objectivity nowadays stands for within contemporary ontology and epistemology beyond the analytic-continental divide. With articles from: Jocelyn Benoist, Ray Brassier, G. Anthony Bruno, Dominik Finkelde, Markus Gabriel, Deborah Goldgaber, Iain Hamilton Grant, Graham Harman, Johannes Hübner, Andrea Kern, Anton F. Koch, Martin Kusch, Paul M. Livingston, Paul Redding, Sebastian Rödl, Dieter Sturma.

Spurious Correlations Aug 06 2020 "Spurious Correlations ... is the most fun you'll ever have with graphs."--Bustle Military intelligence analyst and Harvard Law student Tyler Vigen illustrates the golden rule that "correlation does not equal causation" through hilarious graphs inspired by his viral website. Is there a correlation between Nic Cage films and swimming pool accidents? What about beef consumption and people getting struck by lightning? Absolutely not. But that hasn't stopped millions of people from going to tylervigen.com and asking, "Wait, what?" Vigen has designed software that scours enormous data sets to find unlikely statistical correlations. He began pulling the funniest ones for his website and has since gained millions of views, hundreds of thousands of likes, and tons of media coverage. Subversive and clever, Spurious Correlations is geek humor at its finest, nailing our obsession with data and conspiracy theory.

The NPEC Sourcebook on Assessment: Definitions and assessment methods for critical thinking, problem solving, and writing Feb 09 2021 Volume 1 of this sourcebook is a compendium of information about tests used to assess critical thinking, problem solving, and writing. It serves as a tool for people who want comparative data about the policy relevance of specific student outcomes measured in these areas. An interactive version of Volume 1 allows users to specify their areas of interest and create a customized search of assessment measures in the three domain areas. The tests described in Volume 1 are those that are designed to measure cognitive variables for traditional students. The compendium does not describe less traditional methods such as portfolios and competencies. In addition, the evaluations of the tests are based on the way test developers represent them in their materials and, in some cases, in information from third-part reviews. Volume 2 is a companion volume that provides eight case studies of institutions that have addressed related issues through the use of assessment methods in Volume 1. Volume 1 contains the following sections: (1) "General and Specific Issues in Selecting Assessments"; (2) "Critical Thinking and Problem Solving"; (3) "Templates--Critical Thinking and Problem Solving"; (4) "Writing"; (5) "Templates--Writing Commercially Developed Tests"; and (6) "Templates--Writing Locally Developed Tests." Volume 2 discusses the eight case studies and contains four appendixes providing details about the methodology. (Volume 1 contains 10 tables and 150 references.) (SLD)

Discontinuing Antidepressant Medications Jul 25 2019 One in six people in the US are currently taking psychotropic drugs. In 80% of cases, the medication is taken for long-term use and predominantly involves new-generation antidepressants, such as SSRIs (e.g. paroxetine) and SNRIs (e.g. venlafaxine). When patients want to stop taking these drugs and/or their physicians decide it is time for them to stop, substantial problems often can ensue. About 50% of patients experience withdrawal symptoms that do not necessarily subside after a few days or weeks and may be severe and debilitating. Physicians often do not know what to do in these situations. As a result, patients experiencing the anguish and mental pain of withdrawal syndromes are unlikely to receive appropriate medical attention. Discontinuing antidepressants is a highly technical challenge that requires specific strategies. This handbook guides clinicians through each clinical step (assessment; what the counter-indications would be for stopping or continuing; and how discontinuation can best be achieved). It provides a detailed account of the assessment and management strategies, with many case illustrations and clinical examples, drawing from the literature that is available and the extensive personal experience of the author.

Engineering Economics and Economic Design for Process Engineers Jan 29 2020 Engineers often find themselves tasked with the difficult challenge of developing a design that is both technically and economically feasible. A sharply focused, how-to book, Engineering Economics and Economic Design for Process Engineers provides the tools and methods to resolve design and economic issues. It helps you integrate technical and economic decision making, creating more profit and growth for your organization. The book puts methods that are simple, fast, and inexpensive within easy reach.

Author Thane Brown sets the stage by explaining the engineer's role in the creation of economically feasible projects. He discusses the basic economics of projects — how they are funded, what kinds of investments they require, how revenues, expenses, profits, and risks are interrelated, and how cash flows into and out of a company. In the engineering economics section of the book, Brown covers topics such as present and future values, annuities, interest rates, inflation, and inflation indices. He details how to create order-of-magnitude and study grade estimates for the investments in a project and how to make study grade production cost estimates. Against this backdrop, Brown explores a unique scheme for producing an Economic Design. He demonstrates how using the Economic Design Model brings increased economic thinking and rigor into the early parts of design, the time in a project's life when its cost structure is being set and when the engineer's impact on profit is greatest. The model emphasizes three powerful new tools that help you create a comprehensive design option list. When the model is used early in a project, it can drastically lower both capital and production costs. The book's uniquely industrial focus presents topics as they would happen in a real work situation. It shows you how to combine technical and economic decision making to create economically optimum designs and increase your impact on profit and growth, and, therefore, your importance to your organization. Using these time-tested techniques, you can design processes that cost less to build and operate, and improve your company's profit.

Americans have built an empire on the idea of "race," a falsehood that damages us all but falls most heavily on the bodies of black women and men—bodies exploited through slavery and segregation, and, today, threatened, locked up, and murdered out of

all proportion. What is it like to inhabit a black body and find a way to live within it? And how can we all honestly reckon with this fraught history and free ourselves from its burden? Between the World and Me is Ta-Nehisi Coates's attempt to answer these questions in a letter to his adolescent son. Coates shares with his son—and readers—the story of his awakening to the truth about his place in the world through a series of revelatory experiences, from Howard University to Civil War battlefields, from the South Side of Chicago to Paris, from his childhood home to the living rooms of mothers whose children's lives were taken as American plunder. Beautifully woven from personal narrative, reimagined history, and fresh, emotionally charged reportage, Between the World and Me clearly illuminates the past, bravely confronts our present, and offers a transcendent vision for a way forward.

Understanding Expository Text Jun 23 2019 Originally published in 1985, the various chapters in this volume give examples of research on all three aspects of text understanding - namely, structure, world knowledge and process. More than this, however, the research described represents a shift in emphasis from studying stories, which dominated the field in the late 1970s, to studying expository text. This focus on stories was probably due to the essential first step in any science of examining the simplest materials possible. However, the editors thought that it was time to shift the research focus from stories to expository text and this volume is their attempt to provide this transition.

Letters from Rifka Oct 27 2019 From Newbery media winner Karen Hesse comes an unforgettable story of an immigrant family's journey to America. "America," the girl repeated. "What will you do there?" I was silent for a little time. "I will do everything there," I answered. Rifka knows nothing about America when she flees from Russia with her family in 1919. But she dreams that in the new country she will at last be safe from the Russian soldiers and their harsh treatment of the Jews. Throughout her journey, Rifka carries with her a cherished volume of poetry by Alexander Pushkin. In it, she records her observations and experiences in the form of letters to Tovah, the beloved cousin she has left behind. Strong-hearted and determined, Rifka must endure a great deal: humiliating examinations by doctors and soldiers, deadly typhus, separation from all she has ever known and loved, murderous storms at sea, detainment on Ellis Island--and is if this is not enough, the loss of her glorious golden hair. Based on a true story from the author's family, Letters from Rifka presents a real-life heroine with an uncommon courage and unsinkable spirit.
