Statistics for Criminology and Criminal Justice May 05 2020 "...It is a great textbook for undergrads who are being exposed to statistics in the field for the first time and for Master's students who need a better grasp of the fundamentals of statistics before taking more advanced courses..." —Calli M. Cain, University of Nebraska at Omaha "A must-have textbook for Instructors and students alike in the fields of Criminology and Criminal Justice. The book is user-friendly." —Bonny Mhlanga, Western Illinois University An Introduction to Statistics in Criminology and Criminal Justice Statistics for Criminology and Criminal Justice, Third Edition demonstrates how statistics is relevant to a student's life and future career by illustrating the logical connections between basic statistical concepts and their real-world implications in criminology and criminal justice. Written for students with a limited mathematical background, author Jacinta Gau eases student anxiety around statistics by simplifying the overarching goal of each statistical technique and providing step-by-step instructions for working through the formulas and numbers. Students use real data from the field to build a foundational knowledge of statistics, rather than merely memorizing key terms or formulas. New to the Third Edition NEW Thinking Critically feature encourages students to apply the concepts from the chapter to real-life scenarios, with open-ended questions that are designed to inspire students to think about the nuances of science, statistics, and their application to criminal justice. Additional illustrations and examples in every chapter keep students engaged with the content and offer ample opportunities for them to practice the techniques. New and updated data sets from a wide range of relevant sources, such as the NCVS and UCR, BJS, LEMAS, the Census of

Jails, and much more have been incorporated to give students insights into the state of criminal justice research today. New research on critical topics encourages students to discuss changes happening in the field such as the Census of Jails, inmate-on-staff assaults in prison and homicide rates. Practicing Statistics Whiteboard Videos, available in SAGE edge, walk students through statistical calculations to reinforce key concepts. Previous edition errors have been corrected by a statistician. Give your students the SAGE edge! Criminology Jul 07 2020 "Criminology is a young discipline. In fact, the term "criminology" is only a little more than a century old. But in this brief time, criminology has emerged as an important social and behavioral science devoted to the study of crime and criminal behavior, and the society's response to both. Criminology fosters theoretical debates, contributes ideas and constructs, develops and explores new research methodologies, and suggests policies and solutions to a wide range of crime problems that dramatically affect the lives of countless people in the United States and around the world. Problems as vital and urgent as those addressed in this book are challenging, exciting, and, at the same time, disturbing and tragic. Moreover, these problems are immediately relevant to all of our lives. This is especially true today, when crimes here and abroad touch so many lives, in so many ways. Our goal with this book has been, and remains, to discuss these problems, their origins, and their possible solutions in a clear, practical, straightforward fashion that brings the material to life for students. We invite faculty and students alike to join the authors' in traveling along criminology's path, exploring its expanding boundaries, and mapping out its future"--

Criminological Research for Beginners Jul 27 2019 Criminological Research for Beginners is a comprehensive and engaging guide to research methods in Criminology. Written specifically for undergraduate students and novice researchers, this book has been designed as a practical guide to planning, conducting, and reporting research in the subject. By first inviting readers to consider the importance of criminological research, the book places related methodology firmly in the context of students' broader study of Criminology, before moving on to provide a detailed guide to the practical processes of research. It is common for Criminology undergraduates to feel intimidated at the prospect of conducting their own research, and the students typically struggle to see the relevance of research methods to their own studies. This book speaks directly to the needs of such students, and includes contemporary examples and case studies that bring a topic that is often thought of as dry to life, providing a thorough and accessible practical guide that students can return to at each stage of their research, all the way through to their dissertation. This book covers: an examination of the theoretical, political, and ethical debates in criminological research; a complete guide to planning criminological research, assisting student researchers in identifying their research questions, choosing their research methods, and critiquing the available literature; guidance on the practicalities and processes of collecting data, a discussion of the process of analysing data and writing up research, including an extensive glossary and an integrated companion website with extra examples, exercises, and videos to further develop students' understanding, this book is essential reading for any undergraduate on a Criminological Research Methods course, or for anyone in need of practical guidance on any or every of the various stages involved in conducting thorough and effective criminological research.

**Criminology** Oct 29 2019 **Criminology: Explaining Crime and Its Context, Ninth Edition**, is a highly acclaimed textbook offering a broad perspective on criminological theory. It provides students of criminology and sociology with a thorough exposure to a range of theories, contrasting their logic and assumptions, but also highlighting efforts to integrate and blend these frameworks. In this ninth edition, the authors have incorporated new directions that have gained traction in the field, while remaining faithful to their criminological heritage. Among the themes in this work are the relativity of crime (its changing definition) with abundant examples, historical roots of criminology and the lessons they have provided, and the strength and challenges of applying the scientific method. This revision offers enhanced coverage of biosocial theories of crime, more global examples, and a new chapter on youth violence, improving on the most comprehensive and balanced theory text available for undergraduates.

**Recent Developments in Criminological Theory** Oct 02 2022 This volume contains recent and cutting-edge articles from leading criminological theorists. The book is organized into ten

sections, each representing the latest in the multi-disciplinary orientations representing a cross-section of contemporary criminological theory. These sections include: 1: Classical and Rational Choice; 2: Biological and Biosocial; 3: Psychological; 4: Social Learning and Neutralization; 5: Social Control; 6: Social Ecology, Sub-cultural and Cultural; 7: Anomie and Strain; 8: Conflict and Radical; 9: Feminist and Gender; 10: Critical Criminologies: Anarchist, Postmodernist, Peacemaking. The articles were selected based on their contributions to advancing the field, including ways in which the authors of each chapter understand the current theoretical tendencies of their respective approaches and how they envision the future of their theories. Because of this, the articles focus on theory rather than empirical research. A particular note is the tendency toward integration of different perspectives, as described by editors, Henry and Lukas, in their original introduction to this volume.

Criminologists in the Media Sep 28 2019 Criminologists in the Media presents the results of a cross-national study examining the structures that shape criminologists' contributions to news and social media discourse. Drawing on interviews with criminologists and a survey of 1,211 criminologists working in the US, the UK, Australia, New Zealand, Canada, Ireland, and South Africa, this book represents the first cross-national study exploring how, why, and to what extent criminologists working in these countries engage in newsmaking and digital public criminology. Through examining the predictors of criminologists appearing in news media, the research presented in this book demonstrates that newsmaking practices within criminology are not reflective of equal access, interest, or opportunity. Rather, newsmaking operates within 'fields of power' shaped by the political economy of higher education, and researchers' academic rank, gender, and areas of research expertise. Together, these factors generate several 'situational logics' that predispose criminologists to pursue particular courses of action in promoting their personal projects. Key among these logics, Wood, Richards, and Iliadis argue, are a 'social logic' informing criminologists' moral-political views on newsmaking and an 'industrial logic' responsive to the demands of academic capitalism and the rise of the 'entrepreneurial' university. With its focus on the practicalities, challenges, and inequities of newsmaking in the post-broadcast era, Criminologists in the Media will appeal to researchers interested in the public role(s) of criminology, as well as researchers concerned with the challenges of communicating social scientific knowledge beyond the academy.

**Criminological Skills and Research for Beginners** Apr 15 2021 **Criminological Skills and Research for Beginners** is a comprehensive and engaging guide to research methods in Criminology, and the skills required for academic success. Written specifically for undergraduate students and novice researchers, this book has been designed as a lively and accessible guide to planning, conducting and reporting research in the subject. It emphasises practical skills required in studying Criminology, the importance of criminological research, and places related methodology firmly in the context of students' broader study of the discipline, before moving on to provide a detailed guide to the actual processes of research. It is common for Criminology undergraduates to feel intimidated at the prospect of conducting their own research, and these students typically struggle to see the relevance of research methods to their own studies. This book speaks directly to the needs of such students, and includes contemporary examples and case studies that bring a topic that is often thought of as dry to life, providing a thorough and accessible practical guide that students can return to at each stage of their research, all the way through to their dissertation. This book covers: an examination of the theoretical, political and ethical debates in criminological research; a complete guide to planning criminological research, assisting student researchers in identifying their research questions, choosing their research methods and critiquing the available literature; guidance on the practicalities and processes of collecting data; a discussion of the process of analysing data and writing up research. New to the second edition is a brand new section on research skills in Criminology, including detailed coverage of writing skills, referencing, dissertations and research reports, presentation skills and revision. The book also offers additional coverage of the politics of criminological research and the presentation of official crime statistics. Including an extensive glossary and an integrated companion website with extra examples, exercises and videos to further develop students' understanding, this book is essential reading for any undergraduate on a Criminological Research Methods or Research Skills course, or for anyone in need of practical guidance on any or all of the various stages involved in conducting thorough and effective criminological research.

**The Nurture Versus Biosocial Debate in Criminology** May 05 2020 **The Nurture Versus Biosocial Debate in Criminology: On the Origins of Criminal Behavior and Criminality** takes a contemporary approach to address the sociological and the biological positions of human behavior by allowing preeminent scholars in criminology to speak to the effects of each on a range of topics. Kevin M. Beaver, J.C. Barnes, and Brian B. Boutwell aim to facilitate an open and honest debate between the more traditional criminologists who focus primarily on environmental factors and contemporary biosocial criminologists who examine the interplay between biology/genetics and environmental factors.

**Feminist Criminology** Apr 27 2022 **Feminist criminology** grew out of the Women's Movement of the 1970s, in response to the male dominance of mainstream criminology – which meant that not only were women largely excluded from carrying out criminological research, they were also barely considered as subjects of that research. In this volume, Claire Renzetti traces the development of feminist criminology from the 1970s to the present, examining the diversity of feminisms which have developed: liberal feminist criminology Marxist, radical and socialist feminist criminologies structured action theory left realism postmodern feminism

black/multiracial feminist criminology. She shows how these perspectives have made a great impact on the discipline, the academy, and the criminal justice system, but also highlights the limitations of this influence. How far has feminist criminology transformed research and knowledge production, education, and practice? And how can feminist criminologists continue to shape the future of the discipline?

Uniting Green Criminology and Earth Jurisprudence Mar 15 2021 As planet Earth continues to absorb unprecedented levels of anthropogenically induced environmental and climatic change, two similar academic schools of thought have emerged in recent years, both making sustained efforts to explain how and why this state of affairs has evolved. These two disciplines are known as green criminology and earth jurisprudence. Whilst these areas of study can be seen as sub-disciplines of their parent subjects, law and criminology, this book proposes that much can be achieved by authors uniting and collaborating on their academic work. By doing this, it is argued that green criminology stands to benefit from a discipline that places mother nature at the heart of lawmaking and therefore providing a solution to the environmental harms identified by green criminologists. Furthermore, earth jurisprudence will profit from utilising the breadth of academic work produced within the green criminology academic arena. Therefore, this book seeks to unite green criminology and earth jurisprudence in an effort to find solutions to the extraordinary environmental problems that the world now faces.

Criminology and Queer Theory Mar 03 2020 This book offers critical reflections on the intersections between criminology and queer scholarship, and charts future directions for this field. Since their development over twenty-five years ago, queer scholarship and politics have been hotly contested fields, equally embraced and dismissed. Amid calls for criminology and criminal justice institutions to respond more effectively to the injustices faced by LGBTIQ people, criminologists have recently developed a Queer Criminology and turned to queer scholarship in the process. Through a sweeping analysis of critical criminologies, as well as issues as varied as shame and utopian thought, Matthew Ball points to the many opportunities for criminology to engage further with the more politically disruptive strands of queer scholarship. His analysis highlights that criminology and queer theory are 'dangerous bedfellows', and that navigating the tension between them is central to confronting the social and criminal injustices experienced by LGBTIQ communities. This book will be of particular interest for scholars of criminology, criminal justice, LGBTIQ studies, gender studies and critical theory.

Criminology and Criminal Justice Jan 25 2022 This book presents a summary of the key ideas that seek to explain criminal behaviour and the measures that have been developed to prevent crime. A broad overview of the criminal justice system is provided in order to explain the operations of the key criminal justice agencies and the processes that are involved in bringing offenders to justice. Readers are encouraged to develop the basic knowledge they have obtained in these areas by tackling a number of questions, making use of additional reading or key texts suggested in the book. Attention is devoted to key sources from which information regarding crime and the criminal justice system can be explained. Good practice regarding the presentation and assessment of written work is also provided, in particular in connection with referencing. Readers are also introduced to the wide variety of methods that can be used to carry out criminological research and are invited to engage in exercises that include the marking of sample essays and the design of a questionnaire.

Experimental Criminology Jul 31 2022 Experimental criminology is a part of a larger and increasingly expanding scientific research and evidence-based movement in social policy. The essays in this volume report on new and innovative contributions that experimental criminology is making to basic scientific knowledge and public policy. Contributors explore cutting-edge experimental and quasi-experimental methods and their application to important and topical issues in criminology and criminal justice, including neurological predictors of violence, peer influence on delinquency, routine activities and capable guardianship, early childhood prevention programs, hot spots policing, and correctional treatment for juvenile and adult offenders. It is the first book to examine the full scope of experimental criminology, from experimental tests - in the field and in the laboratory - of criminological theories and concepts to experimental and quasi-experimental evaluations of crime prevention and criminal justice interventions.

Introducing Criminology Feb 11 2021 Criminology, or the study of crime, has developed rapidly as a subject in recent years, while crime and the problem of how to respond to it have become major concerns for society as a whole. This book provides a succinct, highly readable - and much needed - introduction to criminology for those who want to learn more, whether they are already studying the subject, thinking of doing so, or just interested to discover what criminology is about. *Introducing Criminology* begins by asking basic questions: what is crime? what is criminology?, before examining the ways in which crime has been studied, and looking at the main approaches and schools of thought within criminology and how these have been developed. The authors focus particularly upon attempts to understand and explain crime by the disciplines of psychology and sociology, and consider also the impact of feminist and postmodern thought on the development of the subject. In the second part of the book the authors take three very different topics to illustrate themes raised in the first half of the book exploring the particular issues raised by each topic, and showing how criminologists have gone about their work.

What Works in Crime Prevention and Rehabilitation Nov 03 2022 This ambitious volume brings together and assesses all major systematic reviews of the effectiveness of criminological interventions, to draw broad conclusions about what works in policing, corrections, developmental prevention, situational prevention, drug abuse treatments, sentencing and deterrence, and communities. Systematic reviews aim to minimize any possible bias in drawing conclusions by stating explicit criteria for inclusion and exclusion of

studies, by conducting extensive and wide-ranging searches for possibly eligible studies, and by making all stages of the review explicit and transparent so that the methods can be checked and replicated. Over a decade ago, a concerted effort was made by members of the criminology community, including the Editors and contributors of this volume, to bring the practice of systematic reviews to the study of Criminology, providing replicable, evidence-based data to answer key questions about the study of crime causation, detection, and prevention. Now, the pioneers in this effort present a comprehensive stock-taking of what has been learned in the past decade of systematic reviews in criminology. Much has been discovered about the effectiveness of (for example) boot camps, "hot spots" policing, closed-circuit television surveillance, neighborhood watch, anti-bullying programs in schools, early parenting programs, drug treatment programs, and other key topics. This volume will be of interest to researchers in criminology and criminal justice, as well as in related fields such as public health and forensic science, with important implications for policy-makers and practitioners. Decisively showing that the "nothing works" era is over, this volume takes stock of what we know, and still need to know, to prevent crime. I plan to keep this book close at hand and to use it often! Cullen, Distinguished Research Professor Emeritus, University of Cincinnati At a time when there is a broad commitment to bringing science to the front lines of practice, this book should be on the reading list of both policymakers and scholars.
