How to Ask for and Get What You Want Apr 13 2021 We've all experienced frustration asking for and getting what we want. It plays out regularly with our partners, children, employers, and businesses we patronize. Sometimes we

don't bother to ask for what we want, even when it's perfectly reasonable, thinking it will create hard feelings or spark an argument. Often, it's because we don't think we can succeed in getting what we want. But nothing could be further from the truth. How to Ask for What You Want and Get It: Common Sense Tips That Work will help readers learn how to ask for what they want and get good results. It teaches them how to stay in the game by using the right words. It also shows how to build rapport by using positive body language. The more you know what makes people operate as they do, the better chance you'll have of helping them see things your way. The most important aspect to negotiating anything is getting the other person on your side. That means the person you're asking has to like and respect you enough to do what you want. Most of the advice in this book employs mindfulness techniques. The mindfulness movement helps people live in the moment, speak more effectively to one another, and settle problems peacefully.

How You Finish Is What Counts Jul 25 2019

Through the years, I never thought about writing, but I have always stored away certain sayings that I found interesting. One of those titles was *Where the Timbers Cross*, and I always thought that would make a good story. The problem was how to put a story with some of these sayings. It was almost five years before I came up with the story that goes with the book title. I wrote two stories in 1997 and put them in a folder and forgot about them. I happened to give a cousin the stories and asked him to read them. I assumed he would do what I would have done and put them in a drawer and forget about them. I talked to him a few weeks later, and he made copies of the stories and given them to neighbors, relatives, and pastors. I then started hearing from the readers of the stories asking for more stories. My third story was written in 2015. Then I was asked about a book, so here we are. This book composed of thirty-five Christian-fiction stories. Even though the stories are fiction, many are based on true happenings I have come across over the years. Even though my name is on the book, God wrote the stories. About the Author David Ford graduated from East Tennessee State University with a master's degree. He then spent the next thirty-five years

teaching in middle and high school. During those years, he taught biology, advanced biology, environmental science, earth science, physical science, general science, and life science. Since retiring, he enjoys golf, biking, and working out. He also has discovered a hidden talent""writing.

*How to be a Heroine ; Or, what I've Learned from Reading Too Much* Jun 23 2019 "Cathy Earnshaw or Jane Eyre? b>Petrova or Posy? b>Scarlett or Melanie? b>Lace or Valley of the Dolls? On a pilgrimage to Wuthering Heights, Samantha Ellis found herself arguing with her best friend about which heroine was best: Jane Eyre or Cathy Earnshaw. She was all for wild, passionate Cathy; but her friend found Cathy silly, a snob, while courageous Jane makes her own way. And that's when Samantha realised that all her life she'd been trying to be Cathy when she should have been trying to be Jane. So she decided to look again at her heroines the girls, women, books that had shaped her ideas of the world and how to live. Some of them stood up to the scrutiny (she will always love Lizzy Bennet); some of them most decidedly did not (turns out Katy Carr from *What Katy Did* isn't a carefree rebel, she's a drip). There were revelations (the real heroine of *Gone with the Wind*? It's Melanie), joyous reunions (*Anne of Green Gables*), poignant memories (*Sylvia Plath*) and tearful goodbyes (*Lucy Honeychurch*). And then there was *Jilly Cooper*... *How To Be A Heroine* is Samantha's funny, touching, inspiring exploration of the

**Learning Online** Jun 03 2020 At a time when more and more of what people learn both in formal courses and in everyday life is mediated by technology, Learning Online provides a much-needed guide to different forms and applications of online learning. This book describes how online learning is being used in both K-12 and higher education settings as well as in learning outside of school. Particular online learning technologies, such as MOOCs (massive open online courses), multi-player games, learning analytics, and adaptive online practice environments, are described in terms of design principles, implementation, and contexts of use. Learning Online synthesizes research findings on the effectiveness of different types of online learning, but a major message of the book is that student outcomes arise from the joint influence of implementation, context, and learner characteristics interacting with technology--not from technology alone. The book describes available research about how best to implement different forms of online learning for specific kinds of students, subject areas, and contexts. Building on available evidence regarding practices that make online and blended learning more effective in different contexts, Learning Online draws implications for institutional and state policies that would promote judicious uses of online learning and effective implementation models. This in-depth research work concludes with a call for an online learning implementation research agenda, combining education

institutions and research partners in a collaborative effort to generate and share evidence on effective practices.

Biology Of Enlightenment Jun 15 2021 In this book we meet with the modern sage, U.G. Krishnamurti, and listen to his penetrating voice describing life and reality as it is. What is body and what is mind? Is there a soul? Is there a beyond, a God? What is enlightenment? Is there a life after death? Never before have these questions been tackled with such simplicity, candour and clarity. In these unpublished early conversations with friends (1967-71), U.G.discusses in detail his search for the truth and how he underwent radical biological changes in 1967. Preferring to call it the natural state over enlightenment, he insists that whatever transformation he has undergone is within the structure of the human body and not in the mind at all. It is the natural state of being that sages like the Buddha, Jesus and, in modern times, Sri Ramana, stepped into. And U.G.never tires of pointing out that 'this is the way you, stripped of the machinations of thought, are also functioning.'
