Teaching in the Real World Jan 08 2021 This book presents a dialogue of reflective journal entries sent via email between a student teacher and her college supervisor. Miss B is a white, female, graduate student doing her student teaching in an urban high school. Written in a very honest, compassionate, inspiring, thoughtful, and humorous way, her journal illustrates her transformation from a passionate but struggling student teacher to a teacher who has found her voice and the confidence to be an effective teacher in her own classroom. Most student teachers are required to keep a daily reflection/journal. The journal entries in the book are written chronologically and provide an excellent example of what a reflective teacher should look for in trying to improve their teaching. Student teaching is considered to be one of the most important components of pre-service training. It is during these practicums that aspiring teachers apply what they have learned in their courses to the real world in a real classroom. However, many student teachers are unprepared to face the situations they will encounter in urban school settings. Not only will they have to deal with lesson planning, classroom management, working with parents, etc, but also such issues as homelessness, hunger, motivation, and difficult family environments. Miss B makes a lot of mistakes that set her back as well as many decisions that move her forward. Readers of the book will continually be thinking about how they would have dealt with that particular situation as they experience the joys, frustrations, fears, and compromises they may have to confront in their own student teaching. Professors will find this book to be an excellent tool to promote discussions on contemporary critical issues of which pre-service teachers should be aware. To help promote discussion, each chapter ends with Discussion Starters: questions that ask readers to react to key topics discussed in the chapter. Other features include Professor Z's Tips, Strategies, and Relevant Data and Professor Z's Student Teaching Checklist. It will be a valuable resource for all student teachers.

Better Than Carrots or Sticks Apr 30 2020 Classroom management is traditionally a matter of encouraging good behavior and discouraging bad by doling out rewards and punishments. But studies show that when educators empower students to address and correct misbehavior among themselves, positive results are longer lasting and more wide reaching. In *Better Than Carrots or Sticks*, longtime educators and best-selling authors Dominique Smith, Douglas Fisher, and Nancy Frey provide a practical blueprint for creating a cooperative and respectful classroom climate in which students and teachers work through behavioral issues together. After a comprehensive overview of the roots of the restorative practices movement in schools, the authors explain how to \* Establish procedures and expectations for student behavior that encourage the development of positive interpersonal skills; \* Develop a nonconfrontational rapport with even the most challenging students; and \* Implement conflict resolution strategies that prioritize relationship building and mutual understanding over finger-pointing and retribution. Rewards and punishments may help to maintain order in the short term, but they're at best superficially effective and at worst counterproductive. This book will prepare teachers at all levels to ensure that their classrooms are welcoming, enriching, and constructive environments built on collective respect and focused on student achievement.

The Distance Home Jul 22 2019 "[Paula] Saunders skillfully illuminates how time heals certain wounds while deepening others. . . . A mediation of the violence of American ambition." —The New York Times Book Review NAMED ONE OF THE BEST BOOKS OF THE YEAR BY REAL SIMPLE "A deeply involving portrait of the American postwar family" (Jennifer Egan) about sibling rivalry, dark secrets, and a young girl's struggle with freedom and artistic desire In the years after World War II, the bleak yet beautiful plains of South Dakota still embody all the contradictions—the ruggedness and the promise—of the old frontier. This is a place where you can eat strawberries from wild vines, where lightning reveals a boundless horizon, where descendants of white settlers and native Indians continue to collide, and where, for most, there are limited options. René shares a home, a family, and a passion for dance with her older brother, Leon. Yet for all they have in common, their lives are on remarkably different paths. In contrast to René, a born spitfire, Leon is a gentle soul. The only boy in their ballet class, Leon silently endures often brutal teasing. Meanwhile, René excels at everything she touches, basking in the delighted gaze of their father, whom Leon seems to disappoint no matter how hard he tries. As the years pass, René and Leon's parents fight with increasing frequency—and ferocity. Their father—a cattle broker—spends more time on the road, his sporadic homecomings both yearned for and dreaded by the children. And as René and Leon grow up, they grow apart. They grasp whatever they can to stay afloat—a word of praise, a grandmother's outstretched hand, the seductive attention of a stranger—as René works to save herself, crossing the border into a larger, more hopeful world, while Leon embarks on a path of despair and self-destruction. Tender, searing, and unforgettable, *The Distance Home* is a profoundly American story spanning decades—a tale of haves and have-nots, of how our ideas of winning and losing, success and failure, lead us inevitably into various problems with empathy and caring for one another. It's a portrait of beauty and brutality in which the author's compassionate narration allows us to sympathize, in turn, with everyone involved. "A riveting family saga for the ages . . . one of the best books I've read in years." —Mary Karr "Saunders' debut is an exquisite, searing portrait of family and of people coping with whatever life throws at them while trying to keep close to one another." —Booklist (starred review)

Yardsticks Feb 27 2020 Expanded from its previous edition to include ages 13 and 14, this book provides teachers and parents with a quick reference on important childhood developmental issues, explaining what children should be learning and doing in the classroom at each developmental stage. The book begins by discussing how developmental issues can affect administrative and classroom decisions in the areas of mixed age grouping, ability grouping, retention, food, exercise, the structure of the school day, and racial and cultural questions. Each of the 11 chapters, one for each year, includes a narrative description and charts outlining growth patterns, classroom implications, and appropriate curriculum. The charts allow readers to identify developmental "yardsticks" for a given age. These charts outline characteristic growth patterns (physical, social, language, and cognitive) as well as what to expect in the classroom regarding vision and fine motor ability, gross motor ability, cognitive growth, and social behavior. The curriculum charts summarize the developmental continuum between ages 4 and 14, covering reading, writing, mathematics, and thematic units in social science, science, and current events. The book concludes with a list of over 100 favorite books for different ages, and resources for parents and teachers. (HTH)

Opening Minds Mar 22 2022 "Introducing a spelling test to a student by saying, 'Let's see how many words you know,' is different from saying, 'Let's see how many words you know already.' It is only one word, but the already suggests that any words the child knows are ahead of

expectation and, most important, that there is nothing permanent about what is known and not known." — Peter Johnston Sometimes a single word changes everything. In his groundbreaking book *Choice Words*, Peter Johnston demonstrated how the things teachers say (and don't say) have surprising consequences for the literate lives of students. Now, in *Opening Minds: Using Language to Change Lives*, Peter shows how the words teachers choose affect the worlds students inhabit in the classroom, and ultimately their futures. He explains how to engage children with more productive talk and to create classrooms that support not only students' intellectual development, but their development as human beings. Grounded in research, *Opening Minds: Using Language to Change Lives* shows how words can shape students' learning, their sense of self, and their social, emotional and moral development. Make no mistake: words have the power to open minds – or close them.
