Company Valuation Under Ifrs Apr 13 2021 International Financial Reporting Standards (IFRS) are now mandatory in many parts of the world, including Europe, Australia and China. In addition, many countries are in the process of IFRS adoption. Lastly, foreign registrants in US companies no longer have to undertake a costly US-IFRS reconciliation. Therefore, it is clear that investors, analysts and valuers need to understand financial statements produced under IFRS to feed in to their valuations and broader investment decisions. Written by practitioners for practitioners, the book addresses valuation from the viewpoint of the analyst, the investor and the corporate acquirer. It starts with valuation theory: what is to be discounted and at what discount rate? It explains the connection between standard methodologies based on free cash flow and on return on capital. And it emphasizes that, whichever method is used, accurate interpretation of accounting information is critical to the production of sensible valuations. The authors argue that forecasts of cash flows imply views on profits and balance sheets, and that non-cash items contain useful information about future cash flows - so profits matter. The book then addresses the implications for analysis and valuation of key aspects of IFRS including: - Pensions - Stock options - Derivatives - Provisions - Leases The text also sets out which countries use GAAP, as well as the key differences between IFRS and US GAAP treatments of these issues, in addition to their implications for analysis. A detailed case study is used to provide a step-by-step valuation of an industrial company using both free cash flow and economic profit methodologies. The authors then

address a range of common valuation problems, including cyclical or immature companies, as well as the specialist accounting and modelling knowledge required for regulated utilities, resource extraction companies, banks, insurance and real estate companies. Accounting for mergers and disposals is first explained and then illustrated with a detailed potential acquisition using real companies.

Accounting for Derivatives Jul 29 2022 The derivative practitioner's expert guide to IFRS 9 application *Accounting for Derivatives* explains the likely accounting implications of a proposed transaction on derivatives strategy, in alignment with the IFRS 9 standards. Written by a Big Four advisor, this book shares the author's insights from working with companies to minimise the earnings volatility impact of hedging with derivatives. This second edition includes new chapters on hedging inflation risk and stock options, with new cases on special hedging situations including hedging components of commodity risk. This new edition also covers the accounting treatment of special derivatives situations, such as raising financing through commodity-linked loans, derivatives on own shares and convertible bonds. Cases are used extensively throughout the book, simulating a specific hedging strategy from its inception to maturity following a common pattern. Coverage includes instruments such as forwards, swaps, cross-currency swaps, and combinations of standard options, plus more complex derivatives like knock-in forwards, KIKO forwards, range accruals, and swaps in arrears. Under IFRS, derivatives that do not qualify for hedge accounting may significantly increase earnings volatility. This book helps bridge the divide, providing comprehensive IFRS coverage from a practical perspective. Become familiar with the most common hedging instruments from an IFRS 9 perspective Examine FX risk and hedging of dividends, earnings, and net assets of foreign subsidiaries Learn new standards surrounding the hedge of commodities, equity, inflation, and foreign and domestic liabilities Challenge the qualification for hedge accounting as the ultimate objective IFRS 9 is set to replace IAS 39, and many practitioners will need to adjust their accounting policies and hedging strategies to conform to the new standard. *Accounting for Derivatives* is the only book to cover IFRS 9 specifically for the
