Meat Is for Pussies

Mar 09 2021 John Joseph wants men to know, in no uncertain terms, that they don't need to eat steak, burgers, wings, ribs, or any other animal product, for that matter, to be strong—in fact, he would argue, eating animals is for the weak.

Because when your protein sources come from animals, you're missing out on all of the nutritional benefits of a plant-based diet—a diet that can make you more fit, more sexy,

and more manly. In *Meat is for Pussies*, Joseph presents a throw-down of information, offering both personal and scientific evidence that a plant-based diet offers the best path to athleticism, endurance, strength, and overall health. In addition to handily dispelling the myths surrounding meat, Joseph offers workout advice, a meal plan, and recipes that make going plant-based easy. Flavor and vitamin-packed options like the Working Man Stew and Veggie Chili with Cornbread will keep men's (and women's) bodies healthy and energized, while workouts that emphasize cardio and strength training build endurance and stamina and prove that you don't need meat to build muscle. Joseph also offers living proof that living a plant-based lifestyle is badass, from super-athlete Brendan Brazier to MMA champion Jake Shields to Joseph himself, who is an Ironman Triathlete and still rocking out (at the age of fifty-two) on world tours as the frontman for his legendary band the Cro-Mags. Joseph's passion for educating the world about the benefits of a plant-based diet comes through on each page, in a voice and a vocabulary that is uniquely his own. At the end of the day, he wants readers to live a long, healthy, happy life . . . and he won't take no for an answer.

'Regional Universities' and Pedagogy Oct 16 2021 This book explores the issue of graduate employability in rural labour markets. European higher education institutions are expected to be crucial players in terms of regional innovation, contributing through research, education

and formation of human capital. The author asks how this role be played out equally in urban and rural areas. In rural areas, the most educated young members of society often find it impossible to contribute to the local economy and feel forced to seek better prospects in urban centres. The author examines the roles of higher education in rural centres, as well as the transitions from education to work by taking the point of view of students and graduates. Finally, the book offers advice for pedagogies that support the increase of employability potential for rural economies.
