Relics of the Franklin Expedition Nov 01 2022 Sir John Franklin's Arctic expedition departed England in 1845 with two Royal Navy bomb vessels, 129 men and three years' worth of provisions. None were seen again until nearly a decade later, when their bleached bones, broken instruments, books, papers and personal effects began to be recovered on Canada's King William Island. These relics have since had a life of their own--photographed, analyzed, cataloged and displayed in glass cases in London. This book gives a definitive history of their preservation and exhibition from the Victorian era to the present, richly illustrated with period engravings and photographs, many never before published. Appendices provide the first comprehensive accounting of all expedition relics recovered prior to the 2014 discovery of Franklin's ship HMS Erebus.

K2, The Savage Mountain Jul 05 2020 When eleven climbers died on K2 on August 1, 2008, it was a stark reminder that the world's second-highest mountain has, for more than a century, been regarded as the most difficult and dangerous of all—for every four people who reach the top, one dies in the attempt. K2, The Savage Mountain tells the dramatic story of the 1953 American expedition, led by Charles S. Houston, when a combination of terrible storms and illness stopped the team short of the 28,251-foot summit. Then on the descent, tragedy struck, and how the climbers made it back to safety is renowned in the annals of climbing. K2, The Savage Mountain captures this sensational tale with an unmatched power that has earned this book its place as one of the classics of mountaineering literature.
