The Papers of Will Rogers: The final years, August 1928-August 1935 Jun 29 2022 This fifth and final volume of The Papers of Will Rogers traces the career of Oklahoma's beloved entertainer during his most popular years and extends beyond his death in 1935. By 1928, the Oklahoma humorist and commentator had reached national prominence through his newspaper columns, silent films, sound recordings, books, philanthropic endeavors, and lecture tours. His fame, fortune, and influence, however, had yet to crest. This volume showcases a wide variety of documents, including correspondence with some of the most significant figures of the day, revealing Rogers's rise to fame as the nation's leading social and political commentator and as a hugely popular star of radio, stage, and film. Rogers's multifaceted career ended abruptly when he and the famous aviator Wylie Post died in an airplane crash in northernmost Alaska. This documentary history of his final years includes transcripts of radio broadcasts, contracts, and business documents, as well as nearly two hundred telegrams and letters to family, friends, and notable public figures—the majority of which have never before been published. It also covers the aftermath of his fatal airplane accident: the certificate of death, a first-person account of his funeral, settlement of his estate, efforts to pay tribute to his memory, and unauthorized attempts to capitalize on his fame.

Legacies, Logics, Logistics Jan 31 2020 Legacies, Logics, Logistics brings together a set of essays, written both before and after the financial crisis of 2007–08, by eminent Africanist and economic anthropologist Jane I. Guyer. Each was written initially for a conference on a defined theme. When they are brought together and interpreted as a whole by Guyer, these varied essays show how an anthropological and socio-historical approach to economic practices—both in the West and elsewhere—can illuminate deep facets of economic life that the big theories and models may fail to capture. Focusing on economic actors—whether ordinary consumers or financial experts—Guyer traces how people and institutions hold together past experiences (legacies), imagined scenarios and models (logics), and situational challenges (logistics) in a way that makes the performance of economic life (on platforms made of these legacies, logics, and logistics) work in practice. Individual essays explore a number of topics—including time frames and the future, the use of percentages in observations and judgments, the explanation of prices, the coexistence of different world currencies, the reapplication of longtime economic theories in new settings, and, crucially, how we talk about the economy, how we use stable terms to describe a turbulent system. Valuable as standalone pieces, the essays build into a cogent method of economic anthropology.
