**Peaceable Kingdom Lost** Oct 10 2020 William Penn established Pennsylvania in 1682 as a "holy experiment" in which Europeans and Indians could live together in harmony. In this book, historian Kevin Kenny explains how this Peaceable Kingdom--benevolent, Quaker, pacifist--gradually disintegrated in the eighteenth century, with disastrous consequences for Native Americans. Kenny recounts how rapacious frontier settlers, most of them of Ulster extraction, began to encroach on Indian land as squatters, while William Penn's sons cast off their father's Quaker heritage and turned instead to fraud, intimidation, and eventually violence during the French and Indian War. In 1763, a group of frontier settlers known as the Paxton Boys exterminated the last twenty Conestogas, descendants of Indians who had lived peacefully since the 1690s on land donated by William Penn near Lancaster. Invoking the principle of "right of conquest," the Paxton Boys claimed after the massacres that the Conestogas' land was rightfully theirs. They set out for Philadelphia, threatening to sack the city unless their grievances were met. A delegation led by Benjamin Franklin met them and what followed was a war of words, with Quakers doing battle against Anglican and Presbyterian champions of the Paxton Boys. The killers were never prosecuted and the Pennsylvania frontier descended into anarchy in the late 1760s, with Indians the principal victims. The new order heralded by the Conestoga massacres was consummated during the American Revolution with the destruction of the Iroquois confederacy. At the end of the Revolutionary War, the United States confiscated the lands of Britain's Indian allies, basing its claim on the principle of "right of conquest." Based on extensive research in eighteenth-century primary sources, this engaging history offers an eye-opening look at how colonists--at first, the backwoods Paxton Boys but later the U.S. government--expropriated Native American lands, ending forever the dream of colonists and Indians living together in peace.

**Reign of Terror** Jul 07 2020 A New York Times Critics' Top Book of 2021 "An impressive combination of diligence and verve, deploying Ackerman's deep stores of knowledge as a national security journalist to full effect. The result is a narrative of the last 20 years that is upsetting, discerning and brilliantly argued." —The New York Times "One of the most illuminating books to come out of the Trump era." —New York Magazine An examination of the profound impact that the War on Terror had in pushing American politics and society in an authoritarian direction For an entire generation, at home and abroad, the United States has waged an endless conflict known as the War on Terror. In addition to multiple ground wars, the era pioneered drone strikes and industrial-scale digital surveillance; weakened the rule of law through indefinite detentions; sanctioned torture; and manipulated the truth about it all. These conflicts have yielded neither peace nor victory, but they have transformed America. What began as the persecution of Muslims and immigrants has become a normalized feature of American politics and national security, expanding the possibilities for applying similar or worse measures against other targets at home, as the summer of 2020 showed. A politically divided and economically destabilized country turned the War on Terror into a cultural—and then a tribal—struggle. It began on the ideological frontiers of the Republican Party before expanding to conquer the GOP, often with the acquiescence of the Democratic Party. Today's nativist resurgence walked through a door opened by the 9/11 era. And that door remains open. Reign of Terror shows how these developments created an opportunity for American authoritarianism and gave rise to Donald Trump. It shows that Barack Obama squandered an opportunity to dismantle the War on Terror after killing Osama bin Laden. By the end of his tenure, the war had metastasized into a bitter, broader cultural struggle in search of a demagogue like Trump to lead it. Reign of Terror is a pathbreaking and definitive union of journalism and intellectual history with the power to transform how America understands its national security policies and their catastrophic impact on civic life.

**Darkhouse** Oct 02 2022 Perry Palomino is not what you would call 'ordinary'. For one thing, there's her past which she likes to pretend never happened, and then there's the fact that she sees ghosts. Luckily for her, that all comes in handy when she stumbles across Dex Foray, an eccentric producer for an upcoming webcast on ghost hunters. Even though the show's budget is non-existent and Dex himself is a maddening enigma, Perry is instantly drawn into a world that both threatens her life and seduces her with a sense of importance. Her uncle's haunted lighthouse provides the perfect catalyst and backdrop for a horrific mystery that unravels the threads of Perry's fragile sanity and causes her to fall for a man, who, like the most dangerous of ghosts, may not be all that he seems.

**The Benson** Jan 31 2020 "One of my all-time favorite series! Sexy, spooky, and a thrill-ride you don't want to miss!" - USA Today bestselling author Tara Sivec The Benson hotel in Portland, Oregon might look like your ordinary, swanky turn-of-the-century hotel, but deep in the heart of this historic icon, lie a few restless souls with secrets that won't stay buried. Amateur ghost hunters (and your favorite "will they or won't they" pair) Perry Palomino and Dex Foray spend an evening exploring the hotel for their Internet show "Experiment in Terror" - but this is no ordinary hotel and this is no ordinary episode. There's someone here in the Benson, someone dead, who will push the boundaries of what the duo know about ghosts and challenge Perry's very notion of the truth. The Benson is a short novella in the Experiment in Terror Series. It occurs between books #2 (Red Fox) and #3 (Dead Sky Morning) but can also be read as a standalone and is the perfect primer for anyone interested in the best-selling series (currently optioned for television).

**Song for the Dead** Aug 27 2019 My name is Ada Palomino. By day, I'm studying my ass off at design school in Portland, Oregon. By night, I'm slaying demons and ghosts who have dared to slip through the Veil. Or at least, that's what

I should be doing. The problem is Jay, who also happened to be my immortal guardian and now ex-boyfriend, was banished from being with me. And now my new trainer is a previously dead friend of mine that I helped bring back to life. With both of us nursing broken hearts, we embark on a road trip to New Orleans to help him win back his long lost love. As if that's not tricky enough, we're also being hunted by a demon with a grudge, and I'm not sure if all the training in the world is going to help me. One thing for sure, the more complicated our relationship gets, the scarier things become. Whoever said love is a battlefield, never had to fight demons at the same time.

**The Dunfield Terror** Jul 19 2021 It starts with a strange glowing fog that arrives at the height of a snowstorm. A terror from the past has returned, bringing with it death and destruction that threatens to overrun the town. The old stories tell of a post-war experiment gone wrong, one that opened the way for the fog—or whatever was behind it—to begin its reign of terror. A small team of workmen are the last hope to keep their town alive through the long, storm-filled night. But the many horrors that await them are beyond anyone's worst nightmares.

**The Dex-Files** Feb 23 2022 The truth is out there...The Dex-Files is a compilation novella that accompanies the Experiment in Terror Series, and the reader's chance to look inside the smutty, brash, and beguiling mind of fan favorite Dex Foray. In The Dex-Files we find a variety of scenes and chapters from our enigmatic hero's POV, taken from books #1-6 in the series. Some of these scenes have been previously published, albeit from our heroine's POV, while other scenes are completely new. Dex's mind is a frightening place...enjoy the ride. Warning - The Dex-Files contains harsh language and graphic sexual scenes suitable for readers 18 yrs of age and older. It also contains numerous spoilers for the Experiment in Terror Series and is recommended to those who have read books all the novels in the series (including Old Blood). This is not a standalone.

**The Terror Courts** Apr 15 2021 Soon after the September 11 attacks in 2001, the United States captured hundreds of suspected al-Qaeda terrorists in Afghanistan and around the world. By the following January the first of these prisoners arrived at the U.S. military's prison camp in Guantanamo Bay, Cuba, where they were subject to President George W. Bush's executive order authorizing their trial by military commissions. Jess Bravin, the "Wall Street Journal"'s Supreme Court correspondent, was there within days of the prison's opening, and has continued ever since to cover the U.S. effort to create a parallel justice system for enemy aliens. A maze of legal, political, and moral issues has stood in the way of justice--issues often raised by military prosecutors who found themselves torn between duty to the chain of command and their commitment to fundamental American values. While much has been written about Guantanamo and brutal detention practices following 9/11, Bravin is the first to go inside the Pentagon's prosecution team to expose the real-world legal consequences of those policies. Bravin describes cases undermined by inadmissible evidence obtained through torture, clashes between military lawyers and administration appointees, and political interference in criminal prosecutions that would be shocking within the traditional civilian and military justice systems. With the Obama administration planning to try the alleged 9/11 conspirators at Guantanamo--and vindicate the legal experiment the Bush administration could barely get off the ground--"The Terror Courts" could not be more timely.

*Dying to Win* Aug 08 2020 Includes a new Afterword Finalist for the Council on Foreign Relations Arthur Ross Book Award One of the world's foremost authorities on the subject of suicide terrorism, the esteemed political scientist Robert Pape has created the first comprehensive database of every suicide terrorist attack in the world from 1980 until today. In *Dying to Win*, Pape provides a groundbreaking demographic profile of modern suicide terrorist attackers--and his findings offer a powerful counterpoint to what we now accept as conventional wisdom on the topic. He also examines the early practitioners of this guerrilla tactic, including the ancient Jewish Zealots, who in A.D. 66 wished to liberate themselves from Roman occupation; the Ismaili Assassins, a Shi'ite Muslim sect in northern Iran in the eleventh and twelfth centuries; World War II's Japanese kamikaze pilots, three thousand of whom crashed into U.S. naval vessels; and the Tamil Tigers in Sri Lanka, a secular, Marxist-Leninist organization responsible for more suicide terrorist attacks than any other group in history. *Dying to Win* is a startling work of analysis grounded in fact, not politics, that recommends concrete ways for states to fight and prevent terrorist attacks now. Transcending speculation with systematic scholarship, this is one of the most important studies of the terrorist threat to the United States and its allies since 9/11. "Invaluable . . . gives Americans an urgently needed basis for devising a strategy to defeat Osama bin Laden and other Islamist militants." --Michael Scheuer, author of *Imperial Hubris* "Provocative . . . Pape wants to change the way you think about suicide bombings and explain why they are on the rise." --Henry Schuster, CNN.com "Enlightening . . . sheds interesting light on a phenomenon often mistakenly believed to be restricted to the Middle East." --The Washington Post Book World "Brilliant." --Peter Bergen, author of *Holy War, Inc.*

**Come Alive** Apr 27 2022 It's one thing to bring the woman you love back into your life. It's another to try and keep her there. For Dex Foray, convincing Perry Palomino to open herself to their burgeoning relationship has been more challenging than hunting ghosts, battling demons and stalking Sasquatch combined. Luckily, Dex has never been one to back down, even when his life - and heart - are on the line.

**Red Holocaust** Mar 03 2020 Twentieth and twenty-first century communism is a failed experiment in social engineering that needlessly killed approximately 60 million people and perhaps tens of millions more. These high crimes against humanity constitute a Red Holocaust that exceeds the combined carnage of the French Reign of Terror, Ha Shoah, Showa Japan's Asian holocaust, and all combat deaths in World War I and II. This fascinating book investigates high crimes against humanity in the Soviet Union, eastern and central Europe, North Korea, China, Vietnam, Laos and Cambodia 1929-2009, and compares the results with Ha Shoah and the Japanese Asian Holocaust. As in other studies, blame is ascribed to political, ideological and personal causes, but special emphasis is given to internal contradictions in Marx's utopian model as well as Stalinist and post-Stalinist transition systems concocted to realize communist ends. This faulty economic engineering forms a bridge to the larger issue of communism's historical failure. The book includes: - a comprehensive study of the transcommunist holocaust - a judicial assessment of holocaust culpability and special pleadings - an obituary for Stalinism everywhere except North Korea, and a death watch for contemporary communism in China, Vietnam, Laos, Cambodia, North Korea, Cuba and Nepal - a comparative assessment of totalitarian high crimes against humanity - a call for memory as a defense against recurrent economic, racial and ethnic holocausts The book will be useful to undergraduate and higher level students interested in Russian history, Stalism, communism, North and South Korean economic performance and international affairs. Steven Rosefielde is a Professor of Economics at the University of North Carolina, Chapel Hill and a member of the Russian Academy of Natural Sciences.

**The Men Who Stare at Goats** Sep 20 2021 Bizarre military history: In 1979, a crack commando unit was established by the most gifted minds within the U.S. Army. Defying all known laws of physics and accepted military practice, they believed that a soldier could adopt the cloak of invisibility, pass cleanly through walls, and—perhaps most chillingly—kill goats just by staring at them. They were the First Earth Battalion, entrusted with defending America from all known adversaries. And they really weren't joking. What's more, they're back—and they're fighting the War on Terror. An uproarious exploration of American military paranoia: With investigations ranging from the mysterious "Goat Lab," to Uri Geller's covert psychic work with the CIA, to the increasingly bizarre role played by a succession of U.S. presidents, this might just be the funniest, most unsettling book you will ever read—if only because it is all true and is still happening today.

*The Age of Wonder* Sep 08 2020 The Age of Wonder is a colorful and utterly absorbing history of the men and women whose discoveries and inventions at the end of the eighteenth century gave birth to the Romantic Age of Science. When young Joseph Banks stepped onto a Tahitian beach in 1769, he hoped to discover Paradise. Inspired by the scientific ferment sweeping through Britain, the botanist had sailed with Captain Cook in search of new worlds. Other voyages of discovery—astronomical, chemical, poetical, philosophical—swiftly follow in Richard Holmes's thrilling evocation of the second scientific revolution. Through the lives of William Herschel and his sister Caroline, who forever changed the public conception of the solar system; of Humphry Davy, whose near-suicidal gas experiments revolutionized chemistry; and of the great Romantic writers, from Mary Shelley to Coleridge and Keats, who were inspired by the scientific breakthroughs of their day, Holmes brings to life the era in which we first realized both the awe-inspiring and the frightening possibilities of science—an era whose consequences are with us still. BONUS MATERIAL: This ebook edition includes an excerpt from Richard Holmes's *Falling Upwards*.

**Dead Sky Morning** Jun 29 2022 Amateur ghost hunters Perry Palomino and Dex Foray embark on their most terrifying investigation yet. A tiny, fog-shrouded island in the rough strait between British Columbia and Washington State has held a dark secret for decades: It was a former leper colony where over forty souls were left to rot, die and bury each other. Now a functioning campground, Perry and Dex spend an isolated weekend there to investigate potential hauntings but as the duo quickly find out, there is more to fear on D'Arcy Island than just ghosts. The island quickly pits partner against partner, spiraling the pair into madness that serves to destroy their sanity, their relationship and their very lives.

**Strengthening Forensic Science in the United States** Oct 29 2019 Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. *Strengthening Forensic Science in the United States: A Path Forward* provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. *Strengthening Forensic Science in the United States* gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

**Staring at the Sun** Nov 10 2020 Written in Irv Yalom's inimitable story-telling style, *Staring at the Sun* is a profoundly encouraging approach to the universal issue of mortality. In this magisterial opus, capping a lifetime of work and personal experience, Dr. Yalom helps us recognize that the fear of death is at the heart of much of our anxiety. Such recognition is often catalyzed by an "awakening experience"—a dream, or loss (the death of a loved one, divorce, loss of a job or home), illness, trauma, or aging. Once we confront our own mortality, Dr. Yalom writes, we are inspired to rearrange our priorities, communicate more deeply with those we love, appreciate more keenly the beauty of life, and increase our willingness to take the risks necessary for personal fulfillment.

**Preparing for the Psychological Consequences of Terrorism** Apr 03 2020 The Oklahoma City bombing, intentional crashing of airliners on September 11, 2001, and anthrax attacks in the fall of 2001 have made Americans acutely aware of the impacts of terrorism. These events and continued threats of terrorism have raised questions about the impact on the psychological health of the nation and how well the public health infrastructure is able to meet the psychological needs that will likely result. *Preparing for the Psychological Consequences of Terrorism* highlights some of the critical issues in responding to the psychological needs that result from terrorism and provides possible options for intervention. The committee offers an example for a public health strategy that may serve as a base from which plans to prevent and respond to the psychological consequences of a variety of terrorism events can be formulated. The report includes recommendations for the training and education of service providers, ensuring appropriate guidelines for the protection of service providers, and developing public health surveillance for preevent, event, and postevent factors related to psychological consequences.

**The Terror of the Machine** Sep 28 2019 Born of thirteen years of field research, this interdisciplinary work explores the complex intersections of technology, class, gender, and ecology in the transnational milieu of Mexico's maquiladoras, foreign-owned assembly plants located along the U.S. border. Devon Peña examines workplace and community struggles from the perspective of the women who work in the maquiladoras. He describes the workers' struggles for workplace democracy, social justice, and sustainable development. He also observes the circulation of struggle from the factory to the community, highlighting the efforts to establish worker-owned cooperatives in the border region during the 1970s and 1980s. Female maquila workers are typically portrayed as passive, apolitical, and easily exploited. This book, however, presents an opposing view, investigating the "subaltern life of the shop floor"—the workers' informal methods of resistance to hazardous conditions, sexual harassment, and managerial tyranny. Using survey research, oral history, discourse analysis, and site ethnography, the author develops a cogent critique of labor-process theory, a critique grounded on his extensive study of actual workplace politics in the maquiladoras. The Terror of the Machine is a trenchant analysis of the political, cultural, and environmental effects of maquila industrialization and an eloquent and persuasive call for alternatives in the direction of ecologically sustainable and culturally appropriate modes of development.

**Tales of H. P. Lovecraft** Jun 05 2020 When he died in 1937, destitute and emotionally as well as physically ruined, H. P. Lovecraft had no idea that he would one day be celebrated as the godfather of modern horror. A dark visionary, his work would influence an entire generation of writers, including Stephen King, Clive Barker, Neil Gaiman, and Anne Rice. Now, the most important tales of this distinctive American storyteller have been collected in a single volume by National Book Award-winning author Joyce Carol Oates. In tales that combine the nineteenth-century gothic sensibility of Edgar Allan Poe with a uniquely daring internal vision, Lovecraft fuses the supernatural and mundane into a terrifying, complex, and exquisitely realized vision, foretelling a psychically troubled century to come. Set in a meticulously described New England landscape, here are harrowing stories that explore the total collapse of sanity beneath the weight of chaotic events—stories of myth and madness that release monsters into our world. Lovecraft's universe is a frightening shadow world where reality and nightmare intertwine, and redemption can come only from below.
