What is Theory? Sep 28 2019 There is no consensus in the social and cultural sciences on what theory is, and that is as it should be. A consensus would be outright dangerous for the diversity of intellectual life. The perspectives represented in this volume show that theory can be understood as plot, hope, beholding, doxa, heritage, a stalemate, disappointment, personal matter, or family concept. But, even if theory can be defined in many ways, it cannot be defined in any one way. Beyond disciplinary and epistemological differences, theory has the steadfast characteristic of being what academics work with. More than an epistemological matter, the book's title question is an entry into the dynamics of academic practice. The book consists of a multidisciplinary collection of essays that are tied together by a common effort to tell what theory is. These essays are also paired as

dialogues between senior and junior researchers from the same, or allied, disciplines to add a trans-generational dimension to the book's multidisciplinary approach. *What Is Theory?* has been designed for upper division and graduate students in the social sciences and the humanities, but it will also be of interest to anyone who has felt that the question of what theory is can be more easily asked than answered. Contents include: Why Ask What Theory Is? * The History of the Concept of Theory * History of Ideas at the End of Western Dominance * Looking at Theory in Theory in Science * Theory Has No Big Others in Science and Technology Studies * What Social Science Theory Is and What It Is Not * Theory as Hope * Theory Crisis and the Necessity of Theory - The Dilemmas of Sociology * Theory as Disappointment * Theory - A Personal Matter * Theory - A Professional Matter * Economic Theory - A Critical Realist Perspective * For Theoretical Pluralism in Economic Theory * What Is Theory in Political Science? * For a New Vocabulary of Theory in Political Science * Theorizing the Earth * Spatial Theory as an Interdisciplinary Praxis. *** "This highly original, lively and refreshing book is more than welcome: it is needed....the contributors' insights, passion and diversity fully restore the creative value of theorizing as a way to grasp, understand and more importantly shape the world." - Franck Cochoy, Professor of Sociology, U. of Toulouse

Ethnicity and the Colonial State Nov 10 2020 *Ethnicity and the Colonial State* compares the choices of community leaders in three different West African groups (Wolof, Temne, and Ewe), with regard to "selling" their identifications to the colonial rulers. The book thereby addresses ethnicity as a factor in global history.

The Modern Essay in French May 29 2022 As a textual form, the *essai* predominates in modern and contemporary literature in French. Emerging from an earlier tradition and distinguished from its English-language counterpart, the French-language *essai* ranges from Stéphane Mallarmé to Colette, Victor Segalen to Aimé Césaire, Jean Grenier to Pierre Michon. The *essai* remains, however, one of the most hazily identified of textual forms, its definition often depending on the progressive elimination of all other generic possibilities. Excluded from the archigenres (theatre, poetry, récit), it can even be seen as a hold-all category whose role is to absorb the anarchic extremes of writing. It is perhaps this very lack of pretension to orthodoxy that has drawn so many writers to the *essai*. The conventional understanding of the term - as a tentative, unsystematic exploration - stresses the genre's provisional nature, its refusal of any claims to comprehensiveness. The *essai* exploits the devices of anecdote, illustration and humour; it is addressed to a wide and often general audience; it is also intricately linked to the performance of ideological and writerly strategies, often reordering the classical art of rhetoric and persuasion. As the contributions to this volume show, there is a need to outline an ethics and politics, as well as poetics, of *essayism*.

Édith Piaf Jul 19 2021 The world-famous French singer Édith Piaf (1915-63) was never just a singer. This book suggests new ways of understanding her, her myth and her meanings over time at home and abroad, by proposing the notion of an 'imagined' Piaf.

La Représentation et la réinvention des espaces de sociabilité durant le long XVIIIe siècle. Tome VII May 17 2021 Ce volume de Transversales constitue le septième volet des travaux de spécialistes des études sur le dix-huitième siècle français et britannique. Ces chercheurs tentent de redéfinir les modes opératoires de la sociabilité pour chacune des deux nations, à partir de sources célèbres ou méconnues, et s'interrogent sur la réalité de la supériorité du modèle français de sociabilité. Le présent volume s'intéresse plus particulièrement à la représentation et à la réinvention des espaces de sociabilité à partir de sources diverses, correspondance, oeuvres littéraires, archives de sociétés, essais philosophiques, films. Il met en évidence les dimensions urbanistiques et transgressives de l'espace, sa dualité, en étant à la fois imaginaire et physique et s'interroge sur le rôle de l'être humain, acteur et spectateur. La représentation des espaces de sociabilité, telle qu'elle est abordée dans cet ouvrage, pose la question de l'autorité et de la négociation opérée par l'individu entre liberté et appartenance à un groupe socio-culturel lui-même indissociable d'une nation en devenir. This volume is the seventh in the Transversales series published by a group of researchers of different nationalities on the topic of sociability in France and Britain during the Enlightenment. The research focuses on the extent to which a new model of sociability emerged in these nations during this period, and the similarities and differences between the ways this model developed on each side of the Channel. The present volume examines the representation and reinvention of sociable spaces through an excavation of various sources, letters, literary works, archives of societies, philosophical essays, films. It highlights the urbanistic and transgressive aspects of space, its duality, as it is at once physical and imaginary, and it questions the role of human beings, both as actors and spectators. The representation of sociable spaces, as it is dealt with in this work, raises the issue of authority and of the negotiation enacted by the individual between freedom and the membership of a socio-cultural group that is inseparable from a nation in the making.

Ethics for A-Level Mar 03 2020 What does pleasure have to do with morality? What role, if any, should intuition have in the formation of moral theory? If something is 'simulated', can it be immoral? This accessible and wide-ranging textbook explores these questions and many more. Key ideas in the fields of normative ethics, metaethics and applied ethics are explained rigorously and systematically, with a vivid writing style that enlivens the topics with energy and wit. Individual theories are discussed in detail in the first part of the book, before these positions are applied to a wide range of contemporary situations including business ethics, sexual ethics, and the acceptability of eating animals. A wealth of real-life examples, set out with depth and care, illuminate the complexities of different ethical approaches while conveying their modern-day relevance. This concise and highly engaging resource is tailored to the Ethics components of AQA Philosophy and OCR Religious Studies, with a clear and practical layout that includes end-of-chapter summaries, key terms, and common mistakes to avoid. It should also be of practical use for those teaching Philosophy as part of the International Baccalaureate. Ethics for A-Level is of particular value to students and teachers, but Fisher and Dimmock's precise and scholarly approach will appeal to anyone seeking a rigorous and lively introduction to the challenging subject of ethics. Tailored to the Ethics components of AQA Philosophy and OCR Religious Studies.

Liaisons, Enhanced Apr 27 2022 LIAISONS is an innovative beginning-level French program firmly grounded in principles of communicative language teaching and research in second language acquisition. Components of the program are carefully linked together, showing students how they can make connections with their classmates, their instructor, their community, and the French-speaking world. With an engaging mystery film shot on location in Montreal, Quebec, and Paris, the program provides a rich array of communicative activities designed to stimulate interaction inside and outside the classroom. The underlying pedagogical framework in LIAISONS asks students to first discover new vocabulary and grammar

through different mediums, then connect form and meaning through a set of confidence-building activities, and finally, actively create language. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Real and Complex Singularities Nov 22 2021 This volume is a collection of papers presented at the XIII International Workshop on Real and Complex Singularities, held from July 27–August 8, 2014, in São Carlos, Brazil, in honor of María del Carmen Romero Fuster's 60th birthday. The volume contains the notes from two mini-courses taught during the workshop: on intersection homology by J.-P. Brasselet, and on non-isolated hypersurface singularities and Lê cycles by D. Massey. The remaining contributions are research articles which cover topics from the foundations of singularity theory (including classification theory and invariants) to topology of singular spaces (links of singularities and semi-algebraic sets), as well as applications to topology (cobordism and Lefschetz fibrations), dynamical systems (Morse-Bott functions) and differential geometry (affine geometry, Gauss-maps, caustics, frontals and non-Euclidean geometries). This book is published in cooperation with Real Sociedad Matemática Española (RSME)

The French Revolution in Global Perspective Jan 31 2020 Situating the French Revolution in the context of early modern globalization for the first time, this book offers a new approach to understanding its international origins and worldwide effects. A distinguished group of contributors shows that the political culture of the Revolution emerged out of a long history of global commerce, imperial competition, and the movement of people and ideas in places as far flung as India, Egypt, Guiana, and the Caribbean. This international approach helps to explain how the Revolution fused immense idealism with territorial ambition and combined the drive for human rights with various forms of exclusion. The essays examine topics including the role of smuggling and free trade in the origins of the French Revolution, the entwined nature of feminism and abolitionism, and the influence of the French revolutionary wars on the shape of American empire. The French Revolution in Global Perspective illuminates the dense connections among the cultural, social, and economic aspects of the French Revolution, revealing how new political forms—at once democratic and imperial, anticolonial and centralizing—were generated in and through continual transnational exchanges and dialogues. Contributors: Rafe Blaufarb, Florida State University; Ian Coller, La Trobe University; Denise Davidson, Georgia State University; Suzanne Desan, University of Wisconsin-Madison; Lynn Hunt, University of California, Los Angeles; Andrew Jainchill, Queen's University; Michael Kwass, The Johns Hopkins University; William Max Nelson, University of Toronto; Pierre Serna, Université Paris I Panthéon-Sorbonne; Miranda Spieler, University of Arizona; Charles Walton, Yale University

The Great Outdoors Jan 01 2020 "Girls, living in the country will be your chance," her parents tell her. And so Catherine Meurisse spends her childhood outdoors. Construction all around her: an old farmhouse renovated into a home, trees planted, a garden created, dreams cultivated. They dig, they graft, they plant a rosebush "adopted" from Montaigne, a fig tree from Rabelais. They observe the tumult of the outside world: new developments in industrial agriculture, the citification of rural France... With her characteristic humor, Catherine Meurisse has composed a witty poem dedicated to the countryside where her vocation as an artist first took form. The Great Outdoors, like Lightness, her previous album, is a testament to her conviction that nature and art —everything that grows, everything that lives against all opposition— always offer us a chance.

High-Dimensional Probability Dec 12 2020 High-dimensional probability offers insight into the behavior of random vectors, random matrices, random subspaces, and objects used to quantify uncertainty in high dimensions. Drawing on ideas from probability, analysis, and geometry, it lends itself to applications in mathematics, statistics, theoretical computer science, signal processing, optimization, and more. It is the first to integrate theory, key tools, and modern applications of high-dimensional probability. Concentration inequalities form the core, and it covers both classical results such as Hoeffding's and Chernoff's inequalities and modern developments such as the matrix Bernstein's inequality. It then introduces the powerful methods based on stochastic processes, including such tools as Slepian's, Sudakov's, and Dudley's inequalities, as well as generic chaining and bounds based on VC dimension. A broad range of illustrations is embedded throughout, including classical and modern results for covariance estimation, clustering, networks, semidefinite programming, coding, dimension reduction, matrix completion, machine learning, compressed sensing, and sparse regression.

Geopolitical Atlas of the Oceans Sep 20 2021 White not providing an answer to all maritime problems, the 1982 Convention on the Law of the Sea has

successfully solved a number of issues relating to the exercise by States of their sovereignty and jurisdiction over ocean space and its resources. Among its major achievements are the adoption of clear limits of jurisdiction of coastal States over ocean areas and their concomitant rules of navigation; basic guidelines for the use of ocean resources and the creation of institutions, in particular for the exploitation of deep seabed resources and the peaceful settlement of disputes. After centuries of divergent practices, all coastal States have agreed to adopt a uniform limit for their territorial sea at 12 nautical miles. As a result, more than 100 straits used for international navigation have fallen under national sovereignty, thus leading to the adoption of a new regime of transit passage. Beyond the territorial sea, States can establish, whenever possible, an exclusive economic zone to a maximum extent of 200 miles. Such an extension may lead to conflicting claims. Similarly, the definition of the continental shelf as the natural prolongation of land territory under the sea, either arbitrarily fixed at 200 miles (in the absence of a shelf) or extending up to the limit of the continental margin, has led to a second phase of appropriation of maritime spaces by certain coastal States. Finally, as far as the deep seabed beyond the limits of national jurisdiction is concerned, its resources will have to be exploited under the control of the International Seabed Authority established in Jamaica. Within this legal framework, the sea remains more than ever a source of wealth and becomes increasingly an area of conflicts. National geopolitical considerations push States to adopt specific maritime policies generating tensions and conflicts. These are mainly the result of national political and economic ambitions. Fishery resources are becoming scarce, offshore oil and gas production is still essential for the energy balance of nations and possibilities of deep seabed mineral resource exploitation are getting closer. In addition, at 80% of the international trade volume, maritime transport remains the backbone of globalization. Besides, seaborne piracy remains a significant issue and the respect for freedom of navigation through international straits is becoming increasingly important. While some conflicting claims become more acute, some apparently frozen maritime disputes remain worrying. This is the case for example of Greece and Turkey in the Aegean Sea, and Colombia and Venezuela in the Gulf of Venezuela. The situation remains confused in some parts of the Persian Gulf, the waters of which are particularly rich in oil and gas, or off the coast of Africa. Asia also offers a wide range of unresolved maritime conflicts that are increasingly upsetting regional and international stability. It is against the backdrop of these alarming circumstances that this Atlas endeavors to present the various components of present maritime geopolitics. This publication deals with the major issues relating to maritime spaces and their delimitations, navigation and security, international straits and seabed resources. As such, it should represent an essential tool for the understanding of States' ocean policies and governmental stances.

Coleridge's Laws Oct 29 2019 Samuel Taylor Coleridge is best known as a great poet and literary theorist, but for one, quite short, period of his life he held real political power - acting as Public Secretary to the British Civil Commissioner in Malta in 1805. This was a formative experience for Coleridge which he later identified as being one of the most instructive in his entire life. In this volume Barry Hough and Howard Davis show how Coleridge's actions whilst in a position of power differ markedly from the idealism he had advocated before taking office - shedding new light on Coleridge's sense of political and legal morality.

Critique of Black Reason Aug 27 2019 In *Critique of Black Reason* eminent critic Achille Mbembe offers a capacious genealogy of the category of Blackness—from the Atlantic slave trade to the present—to critically reevaluate history, racism, and the future of humanity. Mbembe teases out the intellectual consequences of the reality that Europe is no longer the world's center of gravity while mapping the relations among colonialism, slavery, and contemporary financial and extractive capital. Tracing the conjunction of Blackness with the biological fiction of race, he theorizes Black reason as the collection of discourses and practices that equated Blackness with the nonhuman in order to uphold forms of oppression. Mbembe powerfully argues that this equation of Blackness with the nonhuman will serve as the template for all new forms of exclusion. With *Critique of Black Reason*,

Mbembe offers nothing less than a map of the world as it has been constituted through colonialism and racial thinking while providing the first glimpses of a more just future.

Corpus Jun 17 2021 How have we thought "the body"? How can we think it anew? The body of mortal creatures, the body politic, the body of letters and of laws, the "mystical body of Christ"—all these (and others) are incorporated in the word Corpus, the title and topic of Jean-Luc Nancy's masterwork. Corpus is a work of literary force at once phenomenological, sociological, theological, and philosophical in its multiple orientations and approaches. In thirty-six brief sections, Nancy offers us at once an encyclopedia and a polemical program—reviewing classical takes on the "corpus" from Plato, Aristotle, and Saint Paul to Descartes, Hegel, Husserl, and Freud, while demonstrating that the mutations (technological, biological, and political) of our own culture have given rise to the need for a new understanding of the body. He not only tells the story of this cultural change but also explores the promise and responsibilities that such a new understanding entails. The long-awaited English translation is a bold, bravura rendering. To the title essay are added five closely related recent pieces—including a commentary by Antonia Birnbaum—dedicated in large part to the legacy of the "mind-body problem" formulated by Descartes and the challenge it poses to rethinking the ancient problems of the corpus. The last and most poignant of these essays is "The Intruder," Nancy's philosophical meditation on his heart transplant. The book also serves as the opening move in Nancy's larger project called "The deconstruction of Christianity."

French Verb Drills Aug 20 2021 The shortest route to mastering verb conjugations One of the greatest challenges in learning a language is mastering verb conjugations. The books in the unique Language Verb Drill series make it easier than ever for learners to meet that challenge. Drilling, whether it's for learning a musical instrument, a sport, or a language, is an essential part of a sound education because repeated, concentrated practice makes specialized skills become second nature. Unlike most verb books, which tend to concentrate on tables of conjugations, the books in the Language Verb Drills series allow students to focus exclusively on building mastery of verbs without being distracted by other elements of grammar. Combining the features of a workbook and reference manual, they clearly and systematically explain how a verb system works while providing numerous drills for practice. These revised editions of the popular study guides now include a final review section to reinforce the reader's ability to automatically select the correct verb form.
